THE REVELATION

Engine: So What Powers the Revelation Racer?

Revelation 750 Formula:

Kawasaki ZX7R – great package for those who are beginning their single seater career.

Revelation 1000 Formula:

Suzuki GSX1000R- (K1 to K4) Eligible for F4 & Monoposto) very quick!

New in 2012 - Revelation FR2:

Honda CBR1000R- (2009 to 2010) Not for the faint hearted, 200HP on tap.

Frame: How is it All Held Together?

The Revelation Racer is constructed around a space frame steel box section chassis with MSA specification double roll hoop, in addition to lateral bars and rearward braces to produce a driver 'Safety Cell'.

All this has been designed to meet the high standard of the 750 Motor Club Formula 4, Monoposto Championship, Hill Climbing, Sprinting and several other Championships.

Wheels: What Keeps Me On The Road?

The control tyres for the Revelation racer are the Avon 6.0/21.0-13 slick and wet front tyres and the 7.0/22.0-13 slick and wet rear Formula Ford Zetec tyres, chosen for performance, availability and cost, fitted to the Revelation specification 13" steel or alloy racing wheels.

Note: Other wheel & tyre options are available for the Revelation 1000 Formula and the new for 2012 Revelation FR2.

Body: So How Does it Look So Good?

A controlled lightweight fibreglass bodywork and aero package is designed to maximise style, create functional and adjustable down force.

Note: Available in 2012: Tripple element rear & double element front high down-force wing package for the Revelation 1000 Formula and the new for 2012 Revelation FR2.

Brakes: So How Does this Thing Stop?

The Revelation Racer uses controlled uprights and single pot-slide callipers with solid discs all round, with adjustable brake bias and controlled master brake cylinder.

Note: Alcon superlight brake callipers are available for the new for 2012 Revelation FR2.

Other: Additional Items

ETB Instruments a state of the art wheel mounted data logging system is used on board our cars.

Electronic flappy paddle: Flat shifting, auto-blip downshift system.

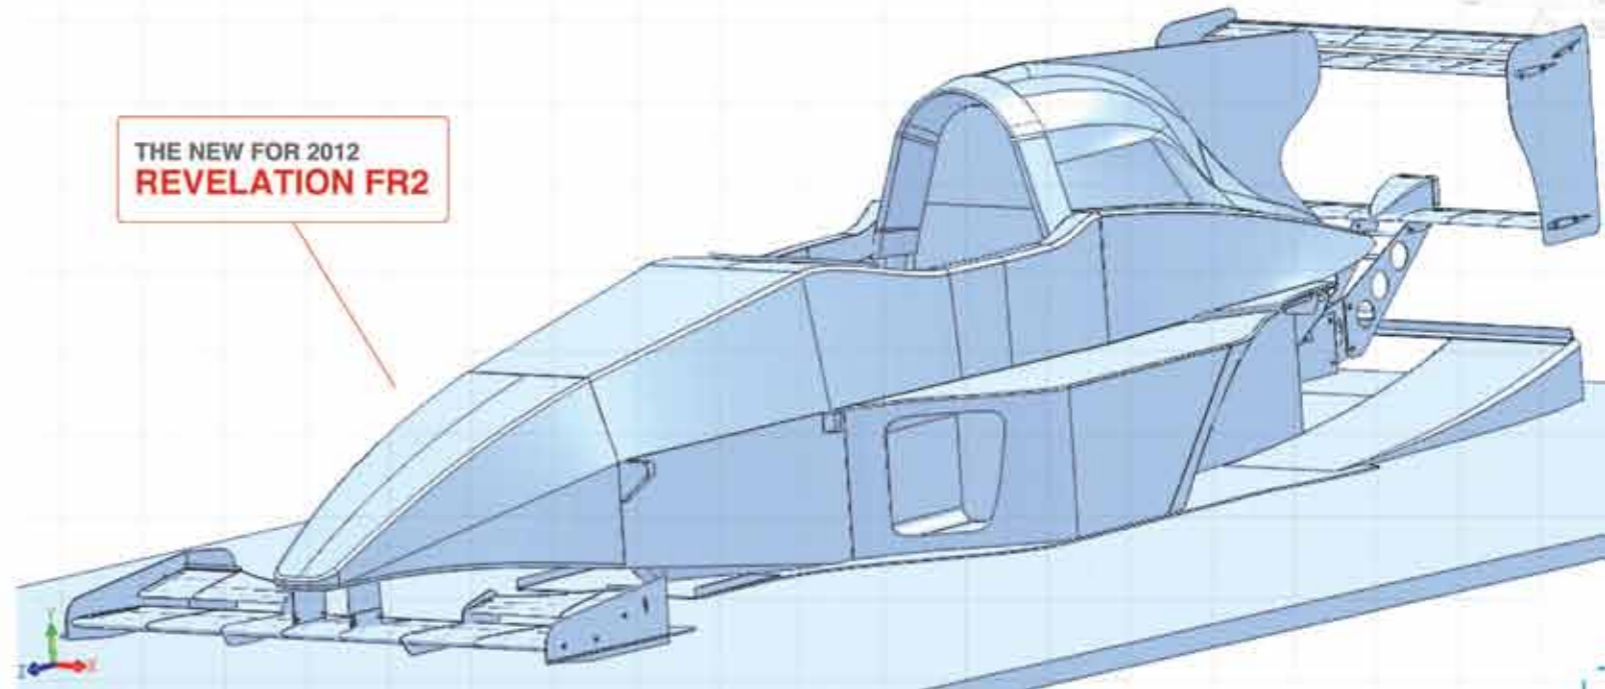

DESIGN + ENGINEERING

Revelation Motorsport are involved in many special projects including:

- Full set up & race prep facilities of all track & race cars
- Re-designs of suspension systems
- New design of chassis & suspension
- On-track development, through test driving & data-logging of existing and new projects
- Installations of new engines

Revelation Motorsport want to turn your dreams into reality, if you have a crazy idea for a project but do not have the full technical knowledge or facilities why not give us a call, we love to hear ideas, why not think out of the box!

THE NEW FOR 2012
REVELATION FR2

DRIVER COACHING

FASTER. SAFER. DRIVER COACHING FOR RACE & TRACK DAYS

With multiple championships under his belt, Yorkshire-based (ARDS) race instructor Tim Harmer caters for all driving abilities and race circuits.

"I have a passion for coaching track drivers, it's a thrill seeing huge improvements in the speed and safety of the drivers I coach. I can meet you where you are with your skills and formulate a plan to move you forward from that point. I believe each driver is an individual, which means the training is not rigidly structured therefore allowing us to work together to improve your style and skills."

- Tim Harmer

DRIVER COACHING: • One-to-one instruction • Cost-effective shared instruction • British & European circuits

CAR ENGINEERING: • Full workshop support • Race preparation • Design & engineering
